# Fedora Meeting Status Report

**Colin Charles**

**colin@fedoraproject.org**

**http://www.bytebot.net/**

# What happened

- Gathered a few people into a room...

- Got some random call-in's...

- Brought out the baseball bats...

- and eventually...

- sorted some things out

- while we had lots of coffee and Krispy Kreme

redhat

# What came out of it

- Assumptions, action items, and goals

- Some of which were:

  - Build system in Raleigh; got moved to Arizona, to a co-lo

  - Core and Extras needed the same build system

    - release early, release often – Extras will have a different/simpler/open build system

  - Core packages must not depend on Extras at all

  - Other architectures that need supporting (like PPC or Sparc) need Extras build boxes

  - Wiki/slash type system on fedora.redhat.com

  - Want: single spec file to manage a package across all kinds of Fedora's, or RHELs; we need packaging guidelines

# More goals

(and you'll see progress for this almost real soon now)

- Build system for Extras will be out in public CVS
    - we want it to be easily replicated on developer machines
- Extras system, needs to be track-able, for security reasons
    - virtualization is something we are thinking about
- Regular meetings with the relevant people, with published meeting minutes will be available
- We are going to **COMMUNICATE!**

# Action Items

- Say it again: we need a build system. CVS module should be available soon.

- Gain further internal (Red Hat) acceptance for resources/scheduling, minimizing blindspots to the community

- Leadership document is to be re-written

- Databases and Bugzilla automation to automate approved packages, entries, states – workflow management

- Packaging guidelines

- How can we bless external sites – legal liability

- Website in CVS for external contributors

- Legacy terminology fixed; Alternatives removed

- fedora-maintainers@redhat.com; fedora-maintainers-readonly@redhat.com
  - need to be a package maintainer to be on it

- Fedora Security

# Fedora Extras Steering Committee

- Newly created

- Mixture of Red Hat and community members

- There'll be a list, and a form of communication that people (YOU!) can contact the Steering Committee

- Warren Togami

- Cristian Gafton

- Greg DeKoenigsberg

- Colin Charles

- Seth Vidal

- Enrico Scholz

- Michael Schwendt

- Ville Skyttä

- Dams Nadé

- Dave Lawrence

- Jeremy Katz

- Tom 'spot' Callaway

- Jesse Keating

![redhat logo]

# Thanks!

- To Red Hat for hosting the meeting (and FUDCon)

- Boston University that decided to host us for FUDCon

- The crazy people that attended the useful meeting:

- Dave Lawrence

- Elliot Lee

- Warren Togami

- Greg DeKoenigsberg

- Jeremy Katz

- Cristian Gafton

- Bill Nottingham

- Paul Nasrat

- Seth Vidal

- Tom 'spot' Callaway

- Karen Bennet

- Michael Tiemann

- Jesse Keating

- Havoc Pennington

- Peter Jones

- Jack Aboutboul

- Colin Charles

- Jef Spaleta/Dams Nade (via bad VoIP connection)

- They're all making a difference to the project for you!
